

THE STATE OF UTAH
OFFICE OF STATE ENGINEER
SALT LAKE CITY

HAROLD A. LINKE
STATE ENGINEER

March 2, 1950

Mr. Darwin Condie
231 North 900 West
Cedar City, Utah

Dear Sir:

It is noted that you recently personally left at the counter in this office, a very rough penciled drawing purported to represent certain construction required of your company.

This is not satisfactory plans and specifications for the head gates mentioned. Therefore, you are required to submit plans and specifications for the construction proposed. These plans should be prepared by a competent engineer. They should be sufficient in detail to represent fully the proposed construction. After these plans have been submitted to the State Engineer, they will be examined and if the construction appears to be adequate, they will be approved for the proposed construction. It is necessary that this be done at once in order that the construction may be made before the irrigation season begins.

Yours truly,

Harold A. Linke
STATE ENGINEER

FWC/vm

enclosed you will find what you ask for in this letter. We had these installed last march. before you wrote & told us this had to be done. South & west field & brig. & Darwin & Condie.
